

CAPABILITY STATEMENT

People Strategies Solutions

Training/ Development

- Leadership (At All Levels)
- Custom Training Development
- Cyber Security Analyst Training / IT Apprenticeships

We assess leaders' training needs, analyze organizational data, and gather stakeholder feedback. Our customized strategies address skill gaps, using the latest industry trends. With a comprehensive e-library, we offer blended face-to-face and virtual training for Leadership, Network Security, Ethical Hacking, and Incident Response, building practical skills for Cybersecurity Analyst and IT training.

People Strategy Advisory / Human Resource Audits

- We evaluate People Strategies, HR practices, conduct surveys, review data, and benchmark. Advise on structure, comp plans, job leveling, succession planning, change management, engagement, and retention.
- We conduct HR audits to identify gaps and measure KPIs for efficient People Strategies. Benchmark across industries, including government, and provide cost-saving suggestions.

Artificial Intelligence (A.I.) Human Resource Technology

- A.I. Talent Sourcing
- A.I. Learning Experience Platforms (LXP)
- A.I. Engagement & Retention Bot
- Predictive Analytics

We use A.I. for talent sourcing, personalized training (LXP), an Engagement Bot for retention, and predictive analytics for data-driven HR decisions.

Cyber Security & Information Technology (IT)

- Cyber Security Department Audit
- Cyber Security Department Set Up
- Cyber Security Skills Assessment
- Cyber Security & IT Personnel

We conduct cybersecurity department audits, assess existing policies, procedures, and technologies for vulnerabilities. For setting up a cybersecurity department, we determine organizational needs, develop security protocols, and recruit skilled personnel. We perform cybersecurity skills assessments to identify knowledge gaps and training needs.

Past Performance
